

AKANANG DAVID IGNATIUS

Python Software Engineer | Production Code Quality | Backend Engineering | AI Evaluation

Abuja, Nigeria | davidakanang@gmail.com | [Portfolio](#) | GitHub | [LinkedIn](#)

PROFESSIONAL SUMMARY

Python Software Engineer with 5+ years of experience developing, debugging, testing, reviewing, and maintaining production software across large multi-file codebases. Experienced in designing scalable backend systems, writing automated test suites with pytest, refactoring legacy applications, implementing production features, and conducting collaborative code reviews using GitHub Pull Requests.

Strong background creating production-quality APIs, debugging complex backend issues, reviewing engineering implementations, and ensuring alignment between software specifications, implementation, testing, and expected outcomes.

Passionate about software quality, engineering best practices, and building realistic production systems that emphasize correctness, maintainability, and reliability.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, PHP, SQL
- **Software Engineering:** Production Debugging, Feature Development, Refactoring, Code Reviews, Pull Request Reviews, Technical Documentation, Production Migrations, Backend Architecture, API Design
- **Testing:** pytest, Unit Testing, Integration Testing, API Testing, Test Coverage, Quality Assurance
- **Frameworks:** Django, FastAPI, React, Next.js

PROFESSIONAL EXPERIENCE

Backend Engineer

VendRush (Remote) | *Nov 2025 - Present*

- Designed and implemented production-ready backend features across a large multi-module Python codebase.
- Authored and maintained automated unit and integration tests using pytest.
- Diagnosed and resolved production issues while improving code maintainability through systematic refactoring.
- Participated in GitHub Pull Request reviews, providing constructive feedback and ensuring adherence to engineering standards.
- Optimized backend performance, API reliability, and database efficiency for a high-growth production platform.

Backend Engineer

LoadTally (Remote) | *Jan 2026 - Apr 2026*

- Implemented robust backend features in a multi-file Python production codebase.
- Debugged and resolved complex production issues, ensuring high reliability and code quality.
- Maintained code quality through systematic refactoring of legacy modules and writing comprehensive unit tests.
- Conducted rigorous peer code reviews via GitHub Pull Requests, emphasizing best practices and testing.
- Optimized database performance and overall backend architecture for production workloads.

Full-Stack Engineer

OyaRiyders | *Jan 2024 - Oct 2025*

- Designed and maintained scalable ride-hailing backend features using Django.
- Authored automated test suites using pytest to ensure robust feature implementation.
- Refactored authentication and payment modules, drastically improving code readability and maintainability.
- Debugged complex WebSocket-powered real-time systems and resolved critical production issues.
- Conducted thorough peer code reviews to maintain high engineering standards across the team.

Backend Engineer

Access Solutions Ltd | *June 2021 - Dec 2023*

- Engineered high-concurrency backend services for government-scale digital platforms.
- Debugged and optimized legacy Python codebases, migrating critical systems to Django.
- Implemented robust Redis caching layers and resolved complex performance bottlenecks.
- Ensured production readiness through rigorous testing, code reviews, and zero-downtime deployments.
- Mentored junior engineers through detailed GitHub PR reviews and architectural guidance.

FEATURED PROJECTS

CampLearn

Scalable Learning Management System | *Python • Django • FastAPI • PostgreSQL*

- Architected a modular backend focusing on code quality and clean API design.
- Implemented scalable feature sets across a multi-file production-ready codebase.
- Maintained strict code review processes and testing standards throughout development.

HausaMaster AI

AI-powered Hausa learning platform

- Built scalable, AI-powered APIs and WebSocket communication features with rigorous testing.
- Conducted exhaustive debugging and refactoring to ensure highly reliable production deployments.

FoodRescue

Open Source Collaboration

- Collaborated in an international engineering team.
- Reviewed peer implementations and pull requests.
- Identified edge cases and software defects.
- Improved code quality through actionable review feedback.
- Worked within a shared, multi-file production codebase.

AI Recruitment Automation Pipeline

Python • Gemini AI

- Developed an end-to-end Python automation pipeline with a clean, highly modular architecture.
- Ensured strong test coverage and conducted systematic debugging for AI integration points.

Gonar Lafiya

Healthcare AI Platform | FastAPI

- Designed production-ready healthcare APIs in FastAPI with a strong emphasis on reliability and QA.
 - Implemented extensive automated testing and resolved architectural issues prior to cloud deployment.
-

EDUCATION

Higher National Diploma (Distinction) *Computer Science* | Federal Polytechnic Bauchi

National Diploma (Upper Credit) *Computer Science* | Plateau State Polytechnic
